

"A table frame that makes
kitchens more accessible"

ROPOX FLEXIPLUS & FLEXIPLUSCORNER

A QUIET, HEIGHT-ADJUSTABLE TABLE FRAME DESIGNED FOR ACCESSIBLE KITCHENS

FlexiPlus is a height-adjustable table frame that comes with a 300 mm adjustment range as standard. If required, it is possible to programme the height adjustment to an even larger range, from 0-660 mm.

The table frame is an improved version of the FlexiElectric table frame. With FlexiPlus you get a more quiet height adjustment, an elegant cover of mounting screws, a more flexible placing of legs and fewer components. Also, you can get a control device with a key lock or as a remote control.

The built-in ROPOX Sicuro anti-collision is an extra safety feature. If you choose to add the safety stop list on the front edge of the worktop, you can avoid trapping risk when operating the table.

If the existing piping hinders the mounting of the table frame, you can install FlexiPlus with protruding legs using distance brackets. This way, you get more room on the worktop, e.g. for sink or hotplates.

On FlexiPlus you can level out the worktop in three dimensions. This allows you to accurately adjust the worktop and get it plumb and level.

The Ropox Connect app allows you to set FlexiPlus to a specific height via Bluetooth wireless technology.

ROPOX FLEXIPLUS/CORNER

Max. load: 150 kg evenly distributed
